PROFESSIONAL SUMMARY

Motivated IT professional and **USMC Veteran** with over 10 years of experience in technical field operations and high-stakes communication. Completing a **BS in Information Technology** (August 2026) and actively pursuing **CompTIA Security+** to meet DoD 8570 compliance. Proven expertise in network troubleshooting, systems installation, and managing sensitive data in regulated environments. Seeking to leverage military discipline and technical training in a Help Desk Technician role within the government contracting sector; fully prepared to undergo reinvestigation for a Security Clearance (previously held Secret).

CORE COMPETENCIES

- **Technical:** Network Troubleshooting (Fiber/Copper), Active Directory, Windows Server, Hardware Installation, System Cabling, SQL (Basic).
- **Compliance:** PII Protection, Regulatory Disclosures, Service Level Agreements (SLAs), SOP Adherence.
- **Soft Skills:** Bilingual (English/Spanish), Leadership (Sergeant), Conflict Resolution, Technical Documentation.

EDUCATION & CERTIFICATIONS

- **Bachelor of Science in Information Technology** | South University | *Expected August 2026*
- **CompTIA Security+** | *In Progress (Target Exam: Fall 2026)*
- **Google IT Support Professional Certificate** | Coursera | 2020

PROFESSIONAL EXPERIENCE

Safelite Solutions | Garland, TX | **Customer Service Representative II** | *Jan 2024 – Present*

- Manage sensitive Personally Identifiable Information (PII) for insurance claimants, ensuring 100% compliance with corporate security protocols.
- Deliver state-mandated legal language and disclosures with 100% accuracy, demonstrating the procedural discipline required for government-regulated environments.
- Utilize proprietary database systems and CRM tools to troubleshoot and resolve complex claim discrepancies.
- Earned multiple corporate "Spotlights" for technical stamina, peer mentorship, and conflict resolution; successfully turned around high-stress escalations and dedicated extended 60+ minute sessions to guide peers through complex technical workflows.

Service Tech, Inc. | **Lead Technician** | *2021 – 2023*

- Supervised complex rack builds and system cabling based on technical design diagrams.
- Coordinated with IT and Project Managers to document network configurations including IP/MAC addresses and switch ports.

AT&T | Premises Technician | 2015 – 2021

- Diagnosed and repaired fiber and copper internet services for commercial and residential clients.
- Maintained 100% accountability for high-value serialized test equipment and company assets.

MILITARY SERVICE

United States Marine Corps | Sergeant; Field Radio Operator | 2007 – 2011

- **Security Clearance:** Previously held and maintained a **Secret Clearance** with 100% accountability for the handling, loading, and securing of **COMSEC (Communications Security) "Crypto"** keys for encrypted satellite and radio networks.
- **Technical Leadership (Radio Chief):** Served as the primary Radio Chief for a Security Company in Afghanistan; managed the inventory, programming, and maintenance of the company's entire communication suite.
- **Network Operations:** Operated as the **Command Operations Center (COC)** Radio Operator in Iraq (Camp Ramadi), managing 12-hour high-tempo night shifts to coordinate secure communications between base command and personnel outside the wire.
- **Training & Mentorship:** Conducted technical training for Marines on the operation of advanced communication equipment and proper radio transmission security (TRANSEC) protocols.
